Who we are

Purebot builds small desk robots that keep people company while they work.

We design for long days at a desk, not for showrooms.

Voice

Purebot speaks warmly, like a friend at your desk.

We are warm and kind before we are clever. We greet people by name and never rush them.

Warm, gentle words; short sentences; no jargon.

Typeface

Typeface: Purebot Sans

Purebot Sans is our only typeface. Use Regular for body and Bold for headings.

Secondary: system UI fonts on devices without Purebot Sans.

Personality

Purebot is attentive and calm. It notices you, then gets out of the way.

It is confident without being loud.

Play

A little play keeps the day light.

Purebot is playful in small doses: a quick bounce, a curious tilt, a cheerful chirp.

Playful moments are short and always end in rest.

Color

Pure Pink #F0126B

Desk White #F3F3F3

Graphite #2B2B30

Soft Violet #785CFF

Warm Sand #E8C9A0

Sound

Short, soft tones. Never more than two cues for one moment.

Pitch sits slightly low and round.

Layout

Generous margins. One idea per screen.

Do and Don't

Do: rest between moves. Do: look at the person you talk to.

Don't: jitter, loop endlessly, or move while someone is typing.

Movement quality

Every movement lands exactly where it should.

Purebot is precise: no wobble, no overshoot, a clean and soft stop.

Precise timing builds trust; sloppy motion breaks it.
